Table of contents

Evgen Byelozorov: Revealing of digital images assembling on the basis of maximum coefficients analysis of wavelet transform.....3

Nataliya Chernetskaya-Beletskaya, Alexsandr Kushchenko, Evgeniy Varakuta, Anna Shvornikova, Denis Kapustin: Define the operational hydro-solid waste handling system.....10

Anatoliy Falendysh, Artem Zinkivskyi, Nikita Bragin: Research of improved mathematical models at operational tests of diesel locomotives.....18

Inna Deyneka, Elena Kireeva, Dmitry Kramarenko: Equipment selection and modernization for producing flour products of whole-grain wheat with mollusc hydrolyzate additive 28

Rostislav Domin, Anatolii Mostovych,Aleksandr Kolomiiets: Improving the means of experimental determination of dynamic loading of the rolling stock.....37

Oleg Druz, Svetlana Gitnaya: Features of welding using integrated protection environment.....50

Nicholay Gorbunov, Maksim Kovtanets, Rostislav Demin: Simulation model of abrasive material motion 60

Nickolay Gorbunov, Olga Prosvirova, Ekaterina Kravchenko: Analysis of railway vehicle braking and assessment of technical solutions efficiency using risk-based methods for technical systems 73

Nikolay Gorbynov, Vladimir Nozgenko, Elena Nozgenko, Sergey Kluev, Ann Bondarenko: Researches of influence of electric current on tribounit "Wheel-rail".....86

Larisa Gubacheva, Alexander Andreev, Svetlana Leonova: New hopper-cars with one-sided self-unloading.....96

Yuriy Kharlamov, Ali Adnan Mansoor Al-Jawaheri: Dimensioning and tolerancing of coated parts 105

Alexander Kravchenko, Olga Sakno: Computer-integrated system of decision-making support of control of tires operation of trucks.....115

Oleg Krol, Svyatoslav Shevchenko, Ivan Sukhorutchenko, Andrii Lysenko: 3D-modeling of the rotary table for tool SVM1F4 with non - clearance worm gearing 126

Valerie Lahno: Information security of critical application data processing systems.....134

Vitaliy Levanichev: Study of multi-layer flow in coextrusion processes 144

Igor Maronchuk, Serhii Bykovsky, Stepan Bondarec, Anna Velchenko: An obtaining of nanoheteroepitaxial structures with quantum dots for high effective photovoltaic devices, investigation of their properties.....154

Genadiy Mogilny, Vitaly Semenkov, Uriy Tihonov: The integration of ontologically oriented technologies in model of knowledge processing.....164

Anna Nikolaenko, Alsayyad Taha Hussein: Modelling of vibrating machine-tool with improved construction.....174

Pavel Nosko, Valentin Shyshov, Denis Ratov, Pavel Fil, Andrii Lysenko: Helical gear train load capacity criterion.....182

Andrey Pankov, Taras Zamota, Andrey Shcheglov: The research of application and working process of fluid-jet elements and devices in planting techniques.....191

Vladimir Pilipenko: Investigation of the process of vibrorheology of cement concrete solutions with the external source of dynamic effect.....200

Denis Rach: NPV simulation as a way to reduce uncertainty in the project 211

Nataliia Rudenko: Technology of shotcreting based on activated binder 222

Michael Samozdra, Eduard Zharikov, Oksana Samozdra: Implementation of automated informational interactions as a part of integrated information-processing system..... 229

Svitlana Sapronova: Theoretical studies of horizontal dynamics parameters of the «wheel-rail» kinematic pair..... 238

Maxim Slobodyanyuk, Grigory Nechayev, Alexandr Kislitsin: Methodics and algorithms for creation of intermodal logistics park..... 248

Valery Starchenko, Vyacheslav Buryak: Spatial contact problems for elastic layer in case of flat areas of contact..... 266

Yuriy Starcheous, Alexander Danileychenko, Konstantin Lupikov: Development of transport heating systems with cascade transformers of energy..... 275

Victor Strelnikov, Maksim Sukov, Juriy Strelnikov: Research of interaction of disc wave generator with flexible gear of heavy loaded wave gearing..... 286

Yuriy Syomin, Tatyana Bondar: Theoretical study of the regularities of wet coal grinding in ball mills at the preparation of water-coal fuel..... 296

Uriy Tihonov, Vitaly Semenkov: Implementation of an information subsystem of a reference library information modern e-learning..... 305

Ilya Tsyganovskiy: A theoretical evaluation of locomotive wheelsets tires wear rate..... 312

Vitaliy Ulshin, Sergey Klyuyev: The reduction in force interaction of wheel with the rail in the curves by means of the automatic control over the locomotive wheel pair position..... 320

Nikolay Ututov, Nataliya Plyasulya: Speeds of movement of the point of gearing along contact lines in screw gear globoid cylindrical tooth gearing..... 331

Igor Zakharchuk, Olexsander Zakharchuk, Igor Bukhtiyarov: Rational design of rotor of the asynchronous motor fan for cooling units of diesel locomotives..... 339

List of the Reviewers

1. Ahromkin Evgeniy
2. Belodedov Viktor
3. Bolshakov Vladimir
4. Budikov Leonid
5. Chernetskaya-Beletskaya Nataliia
6. Chesnokov Aleksey
7. Gorbunov Nickolay
8. Gubacheva Larisa
9. Gutyko Yuriy
10. Kasyanov Nickolay
11. Kirichenko Irina
12. Korobetskiy Yuriy
13. Kostyukevich Alexandr
14. Kravchenko Alexandr
15. Kulikov Yuriy
16. Levi Leonid
17. Marchenko Dmitriy
18. Mogilny Gennadiy
19. Nechaev Grigoiy
20. Osenin Yuriy
21. Pavel Nosko
22. Petelguzov Nickolay
23. Pogidaev Vitaliy
24. Pogorelov Oleg
25. Ramazanov Sultan
26. Sapronova Svetlana
27. Savin Lev
28. Shishkin Alexandr
29. Shvedchikova Irina
30. Skvirskiy Viktor
31. Sokolov Vladimir
32. Starchenko Valeriy
33. Svoevolina Galina
34. Tkach Pavel
35. Tkachenko Victor
36. Ulshin Vitaliy
37. Ulyanitsky Vasily
38. Vitrenko Vladimir
39. Yakovenko Valeriy

Editors of the „TEKA" quarterly journal of the Commission of Motorization and Energetics in Agriculture would like to inform both the authors and readers that an agreement was signed with the Interdisciplinary Centre for Mathematical and Computational Modelling at the Warsaw University referred to as "ICM". Therefore, ICM is the owner and operator of the IT system needed to conduct and support a digital scientific library accessible to users via the Internet called the "ICM Internet Platform", which ensures the safety of development, storage and retrieval of published materials provided to users. ICM is obliged to put all the articles printed in the "Motrol" on the ICM Internet Platform. ICM develops metadata, which are then indexed in the "Agro" database.

Impact factor of the TEKA quarterly journal according to the Commission of Motorization and Energetics in Agriculture is 1,88 (February 2014).

GUIDELINES FOR AUTHORS (2014)

The journal publishes the original research papers. The papers (min. 8 pages) should not exceed 12 pages including tables and figures. Acceptance of papers for publication is based on two independent reviews commissioned by the Editor.

Authors are asked to transfer to the Publisher the copyright of their articles as well as written permissions for reproduction of figures and tables from unpublished or copyrighted materials.

Articles should be submitted electronically to the Editor and fulfill the following formal requirements:

- Clear and grammatically correct script in English,
- Format of popular Windows text editors (A4 size, 12 points Times New Roman font, single interline, left and right margin of 2,5 cm),
- Every page of the paper including the title page, text, references, tables and figures should be numbered
- SI units should be used

Please organize the script in the following order (without subtitles):

Title, Author(s) name (s), Affiliations, Full postal addresses, Corresponding author's e-mail

Abstract (up to 200 words), Keywords (up to 5 words), Introduction, Materials and Methods, Results, Discussion (a combined Results and Discussion section can also be appropriate), Conclusions (numbered), References, Tables, Figures and their captions

Note that the following should be observed:

An informative and concise title; Abstract without any undefined abbreviations or unspecified references; No nomenclature (all explanations placed in the text); References cited by the numbered system (max 5 items in one place); Tables and figures (without frames) placed out of the text (after References) and figures additionally prepared in the graphical file format jpg or cdr.

Make sure that the tables do not exceed the printed area of the page. Number them according to their sequence in the text. References to all the tables must be in the text. Do not use vertical lines to separate columns. Capitalize the word 'table' when used with a number, e.g. (Table1).

Number the figures according to their sequence in the text. Identify them at the bottom of line drawings by their number and the name of the author. Special attention should be paid to the lettering of figures – the size of lettering must be big enough to allow reduction (even 10 times). Begin the description of figures with a capital letter and observe the following order, e.g. Time(s), Moisture (%, vol), (%, $m^3m^{-3)}$ or (%, gg^{-1}), Thermal conductivity (W $m^{-1}K^{-1}$).

Type the captions to all figures on a separate sheet at the end of the manuscript.

Give all the explanations in the figure caption. Drawn text in the figures should be kept to a minimum. Capitalize and abbreviate 'figure' when it is used with a number, e.g. (Fig. 1).

Colour figures will not be printed.

Make sure that the reference list contains about 30 items. It should be numbered serially and arranged alphabetically by the name of the first author and then others, e.g.

7. Kasaja O., Azarevich G. and Bannel A.N. 2009. Econometric Analysis of Banking Financial Results in Poland. Journal of Academy of Business and Economics (JABE), Vol. IV. Nr 1, 202–210.

References cited in the text should be given in parentheses and include a number e.g. [7].

Any item in the References list that is not in English, French or German should be marked, e.g. (in Italian), (in Polish).

Leave ample space around equations. Subscripts and superscripts have to be clear. Equations should be numbered serially on the right-hand side in parentheses. Capitalize and abbreviate 'equation' when it is used with a number, e.g. Eq. (1). Spell out when it begins a sentence. Symbols for physical quantities in formulae and in the text must be in italics. Algebraic symbols are printed in upright type.

Acknowledgements will be printed after a written permission is sent (by the regular post, on paper) from persons or heads of institutions mentioned by name.
