

Table of contents

Alexandra Andrianova, Tamara Anisimova: The modern status analyse of working conditions of current industry in the field of transport engineering	3
Valerij Bunyachenko: Wind regime on the waste dumps	12
Mikhail Chaltsev: Pressue losses design while bulk solids pneumatic conveying.....	20
Vladimir Dobroskok, Andrei Shpilka, Marina Morneva, Nikolai Shpilka: Increase in efficiency of electric powered diamond grinding of conductive material by regulating longitudinal profile of grinding wheels.....	26
Igor Eremejev, Aleksandr Polulyakh, Danil Polulyakh, Oleg Grachyov: Dehydration of no flotation size coal's slimes on the deck of high-frequency screen with multislopes area's working surface	34
Ekaterina Golub, Aleksandr Zabolotny`j, Nikolaj Koshevoj, Irina Kirichenko: Synthesis of test actions for capacitive moisture meter that is invariant to change of substance type.....	43
Irina Kirichenko, Alexandr Kashura, Marina Morneva, Sergey Popov: Modeling of rolling friction with sliding	53
Oleg Krol, Maxim Belkov: Study dynamics machining centre SF68VF4	59
Oleg Lehtsier: Increase accuracy of system operation of unloading heavy coal sinks and middlings in jigs	68
Yuriy Yu. Osenin, Igor Sosnov, Oksana Sergienko, Iryna Biloborodova: Heat abstraction from contact zone of working elements of disc brake.....	79
Alexey Pismensky, Vitaly Ulshin: Synthesis of extreme control system of coal cleaning in jigs	86
Maksim Pronin, Evgeniy Shapran: Influence of construction parameters on traction qualities of conveyor on an air cushion with inclined round channels	96
Valentin Rach, Masaud Sultan: Temporal evaluation criteria of project-oriented socio-economic and technical systems development	103
Sultan Ramazanov, Anna Voronova: Economic-mathematical modelling of rational water use and minimization engineering enterprise's negative impact on the environment.....	112
Galina Ripka, Anatoly Mychko, Inessa Deyneka: The analysis of machine embroidery stitches types classification	120
Natalya Ryazantseva: Application of artificial intelligence methods to the study and analysis of the causes of employee turnover at enterprises.....	127
Elena Savelieva: Study of waste dumps impact on the adjacent areas	138

Nikolay Sidorov, Evgen Byelozorov: Method for identification the recording device of digital images.....	146
Maxim Slobodyanyuk, Anna Nikitina, Grigory Nechayev, Nataliya Rakovskaya: Mathematical model of deformation of railway sleeper track structure with the step change of stiffness on the elastic winkler foundation of the constant stiffness	152
Victor Solovyov, Yana Byelozorova: Multifractal approach in pattern recognition of an announcer's voice	164
Mykola Zaichenko, Antonina Nazarova, Qosai Marshdi: Effect of expansive agent and shrinkage reducing admixture in shrinkage-compensating concrete under hot-dry curing environment.....	170
Igor Zakharchuk: Modelling of electromagnetic processes in ferromagnetic screens shorted winding asynchronous motor-fan with two rotor package using program complex FEMM 3.4	179

List of the Reviewers

- | | |
|------------------------------------|------------------------|
| 1. Belodedov Viktor | 15. Osenin Yuriy |
| 2. Bratchun Valerii | 16. Pogidaev Vitaliy |
| 3. Budikov Leonid | 17. Pogorelov Oleg |
| 4. Chernetskaya Nataliya, | 18. Rajbicheva Lulmila |
| 5. Chernetskaya-Byletskaya Natalia | 19. Ramazanov Sultan |
| 6. Danich Vitaly | 20. Shvedchikova Irina |
| 7. Gubacheva Larisa | 21. Sokolov Vladimir |
| 8. Gutyko Yuriy | 22. Starchenko Valeriy |
| 9. Kharlamova Alina | 23. Tararychkin Igor |
| 10. Kunitsa Anatoliy | 24. Ulshin Vitaly |
| 11. Maksimova Tetiana | 25. Yakovenko Valery |
| 12. Marchenko Dmitriy | 26. Yefremov Olexander |
| 13. Mishchenko Nikolay | 27. Zubova Liliaj |
| 14. Nechaev Grigoiy | 28. Zubov Anton |

Editors of the „TEKA” quarterly journal of the Commission of Motorization and Energetics in Agriculture would like to inform both the authors and readers that an agreement was signed with the Interdisciplinary Centre for Mathematical and Computational Modelling at the Warsaw University referred to as “ICM”. Therefore, ICM is the owner and operator of the IT system needed to conduct and support a digital scientific library accessible to users via the Internet called the “ICM Internet Platform”, which ensures the safety of development, storage and retrieval of published materials provided to users. ICM is obliged to put all the articles printed in the “Motrol” on the ICM Internet Platform. ICM develops metadata, which are then indexed in the “Agro” database.

Impact Factor of the TEKA quarterly journal according to the Commission of Motorization and Energetics in Agriculture is 1,35 (June 2014).

GUIDELINES FOR AUTHORS (2014)

The journal publishes the original research papers. The papers (min. 8 pages) should not exceed 12 pages including tables and figures. Acceptance of papers for publication is based on two independent reviews commissioned by the Editor.

Authors are asked to transfer to the Publisher the copyright of their articles as well as written permissions for reproduction of figures and tables from unpublished or copyrighted materials.

Articles should be submitted electronically to the Editor and fulfill the following formal requirements:

- Clear and grammatically correct script in English,
- Format of popular Windows text editors (A4 size, 12 points Times New Roman font, single interline, left and right margin of 2,5 cm),
- Every page of the paper including the title page, text, references, tables and figures should be numbered
- SI units should be used

Please organize the script in the following order (without subtitles):

Title, Author(s) name (s), Affiliations, Full postal addresses, Corresponding author's e-mail

Abstract (up to 200 words), Keywords (up to 5 words), Introduction, Materials and Methods, Results, Discussion (a combined Results and Discussion section can also be appropriate), Conclusions (numbered), References, Tables, Figures and their captions

Note that the following should be observed:

An informative and concise title; Abstract without any undefined abbreviations or unspecified references; No nomenclature (all explanations placed in the text); References cited by the numbered system (max 5 items in one place); Tables and figures (without frames) placed out of the text (after References) and figures additionally prepared in the graphical file format jpg or cdr.

Make sure that the tables do not exceed the printed area of the page. Number them according to their sequence in the text. References to all the tables must be in the text. Do not use vertical lines to separate columns. Capitalize the word 'table' when used with a number, e.g. (Table1).

Number the figures according to their sequence in the text. Identify them at the bottom of line drawings by their number and the name of the author. Special attention should be paid to the lettering of figures – the size of lettering must be big enough to allow reduction (even 10 times). Begin the description of figures with a capital letter and observe the following order, e.g. Time(s), Moisture (%), vol), (%), m^3m^{-3}) or (%), gg^{-1}), Thermal conductivity ($\text{W m}^{-1}\text{K}^{-1}$).

Type the captions to all figures on a separate sheet at the end of the manuscript.

Give all the explanations in the figure caption. Drawn text in the figures should be kept to a minimum. Capitalize and abbreviate 'figure' when it is used with a number, e.g. (Fig. 1).

Colour figures will not be printed.

Make sure that the reference list contains about 30 items. It should be numbered serially and arranged alphabetically by the name of the first author and then others, e.g.

7. Kasaja O., Azarevich G. and Bannel A.N. 2009. Econometric Analysis of Banking Financial Results in Poland. *Journal of Academy of Business and Economics (JABE)*, Vol. IV. Nr 1, 202–210.

References cited in the text should be given in parentheses and include a number e.g. [7].

Any item in the References list that is not in English, French or German should be marked, e.g. (in Italian), (in Polish).

Leave ample space around equations. Subscripts and superscripts have to be clear. Equations should be numbered serially on the right-hand side in parentheses. Capitalize and abbreviate 'equation' when it is used with a number, e.g. Eq. (1). Spell out when it begins a sentence. Symbols for physical quantities in formulae and in the text must be in italics. Algebraic symbols are printed in upright type.

Acknowledgements will be printed after a written permission is sent (by the regular post, on paper) from persons or heads of institutions mentioned by name.
