|                                                                                                                                                                                                                                                                                                                   |    |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| <b>Małgorzata Budzeń, Agnieszka Sujak, Dariusz Wiącek</b><br>Effect of Pre-Sowing Laser Treatment of Seed on the Biomass Yield and Energy Value<br>of <i>Lavatera Thuringiaca</i> L. Plant .....                                                                                                                  | 3  |
| <b>Józef Gorzelany, Dagmara Migut, Natalia Matłok, Piotr Kuźnar</b><br>Assessment of Mechanical Properties of Fresh Fruit and Brine Pickles Obtained from Selected Varieties<br>of Field Cucumber, Depending on the Chemical Composition of Brine, Duration of Pickling<br>and Additional Starting Cultures ..... | 7  |
| <b>Józef Gorzelany, Mirela Kotlicka, Natalia Matłok, Dagmara Migut, Grzegorz Witek</b><br>Assessment of Selected Physical Properties of Fresh and Stored Large Cranberry Fruit .....                                                                                                                              | 13 |
| <b>Marcin Kaliszewski, Paweł Mazuro</b><br>Alternative FEM Algorithm of Determining Piston Ring Pressure Distribution<br>on a Cylinder to a Contact Simulation .....                                                                                                                                              | 19 |
| <b>Krishna Kayastha</b><br>Development of Water Well with Circulating Treatment .....                                                                                                                                                                                                                             | 23 |
| <b>Boris Kotov<sup>1</sup>, Roman Kalinichenko<sup>2</sup>, Anatoliy Spirin<sup>1</sup></b><br>Mathematical Modeling of Heat and Mass Transfer Process<br>Under Heat Treatment of Grain Materials in Dense Layer .....                                                                                            | 35 |
| <b>Piotr Kuźniar, Wacław Jarecki, Stanisław Sosnowski, Dorota Bobrecka-Jamro, Natalia Matłok, Dagmara Migut</b><br>The Effect of Different Sowing Rate, Foliar Fertilization and Chemical Composition on the Mechanical Properties of<br>Narrow-Leaved Lupine Seeds ( <i>Lupinus angustifolius</i> L.) .....      | 43 |
| <b>Vasily Olshanskii, Alexander Olshanskii, Sergey Kharchenko, Farida Kharchenko</b><br>Analytical Method for Determining Porosity in the Layer of Vibro Separated Grain Mixture .....                                                                                                                            | 49 |
| <b>Eduard Petrenko, Mahdi Gharakhanlou</b><br>Analysis of Slope at the Static Load Increase .....                                                                                                                                                                                                                 | 57 |
| <b>M. Piven</b><br>Planned Motion Equations of Free-running Grain Mixture Flow .....                                                                                                                                                                                                                              | 63 |
| <b>Iryna Ustinova</b><br>Theoretical Principles of Wave Urbanistics .....                                                                                                                                                                                                                                         | 73 |

**Grzegorz Wcisło, Bolesław Pracuch**

|                                                                                                                                                             |    |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| Determination of the distillation parameters of the milesPLUS® <i>diesel</i> fuel comprising a bio-component in the form of methyl esters of corn oil ..... | 83 |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------|----|

**Grzegorz Wcisło, Bolesław Pracuch**

|                                                                       |    |
|-----------------------------------------------------------------------|----|
| Rapeseed Cake as a High-Energy Additive to rape Stalk Briquette ..... | 87 |
|-----------------------------------------------------------------------|----|

**Ryszard Wolny, Tadeusz Złoto**

|                                                                        |    |
|------------------------------------------------------------------------|----|
| Modern Robots in the Painting Process of the Load-Carrying Boxes ..... | 91 |
|------------------------------------------------------------------------|----|

**Nataliya Zhuravska, Eduard Malkin**

|                                                                                   |    |
|-----------------------------------------------------------------------------------|----|
| Energy-saving Technologies with the Use of Water Treated in Magnetic Fields ..... | 97 |
|-----------------------------------------------------------------------------------|----|
