

Table of contents

<i>A. Asmankina, M. Loria, O. Tselishev, A. Zhydkov</i> Hit-pumped step setting with a hydrodynamic cavitation device.....	5
<i>Y. Stentsel, O. Porkuian, K. Litvinov</i> Mathematical models of rheological transformations during transfer of potential of mass, energy and momentum pulse.....	11
<i>S. Kovalyshyn, O. Shvets, V. Dadak</i> Modelling of force action on ellipsoid-shape seed in separator channel	19
<i>O. Tselishchev, M. Loria, Boichenko S., Nosach V., I. Shkilniuk</i> Transformation of n-alkanes of gasoline into components of motor fuels in cavitation field	25
<i>I. Flys, M. Makar, V. Jankiv, V. Tomyuk</i> Efficiency of the modes of hydrothermal processing of buckwheat grains in the production of cereals.....	31
<i>S. Syrotiuk, V. Syrotiuk, B. Boltianskyi</i> Hybrid system of power supply with application of wind and solar energy.....	37
<i>V. Rys</i> Development of standard size pullers for bearings.....	45
<i>I. Kolodiychuk, V. Stanko</i> Institutional support of the Mountain territories development in Ukraine: evaluation and improvement directions	51
<i>W. Kruszelnicka, P. Baldowska-Witos, J. Flizikowski, A. Tomporowski, R. Kasner</i> Energy balance of wood biomass utilization. Part I – characteristics of the problem and research methodology.....	55
<i>W. Kruszelnicka, P. Baldowska-Witos, J. Flizikowski, A. Tomporowski, R. Kasner</i> Energy balance for wood biomass utilization. Part II – tests results.....	61
