

Spis treści

Karol F. Abramek	
Randomness analysis of gas scavenge measurements	5
Zbigniew Burski	
An analysis of power effectiveness of speed profile in view of driving acceleration in urban means of transport, using SAS system	11
Zbigniew Burski, Joanna Tarasińska	
Correlation analysis of an influence of a piston's gabarit-mass modification in a s-4002/3 engineon vibrations in conditions of limitary clearance	17
Krzysztof Danilecki	
Application of the time density characteristics in optimisation of parameters of an engine with sequential turbo-charging	23
Taras Gucol, Ivan Bendera, Janusz Nowak	
Grounding the parameters of the pneumatic device for pests collecting	35
Jarosław Knaga	
Changeability of heat output of heat pump with scroll type compressor	41
Ryszard Konieczny, Lech Pieczyński	
Determining the energy of a wind rotor in a pulverizing aerator system	46
Ryszard Kulig	
Effects of conditioning methods on energy consumption during pelleting	52
Ryszard Kulig	
Steam and heat consumption during conditioning of vegetable feed raw materials in the pelleting process	59
Piotr Kuźniar, Stanisław Sosnowski	
An attempt at measurement of the air volume in bean pods	68
Maciej Lisowski	
Impact analysis of dynamic supercharging on engine properties	73
Jaromir Mysłowski, Ryszard Wołoszyn	
Search for alternative fuels for combustion engines	80
Czesław Puchalski, Józef Gorzelany, Grzegorz Zagula, Gerald Brusewitz	
Firmness determination using computer machine vision system	92
Zbigniew Stropiek, Krzysztof Gołacki	
Determining apple mass on the basis of rebound energy during impact	100
Mariusz Szzymanek	
Analysis of cutting process of plant material	106
Henryk F. Tylicki	
Inference rules in machine state forecasting	114
