PREFACE

Dear Editor-In-Chief, Prof. Eugeniusz Krasowski

On the occasion of the 9th Volume's Edition of TEKA – an international scientific –technical magazine of the Polish Academy of Sciences – Branch in Lublin, The Lublin University of Technology and our University, I would like, on behalf of the professors and teachers of the East-Ukrainian Vladimir Dahl National University, to congratulate you on your valuable effort resulting in this competent and professional academic journal. I feel honoured to be invited to participate in the project.

The TEKA is a widely recognised and appreciated magazine enjoying a great popularity among academic communities, which is proved by the participation of numerous outstanding authors - famous East-Central European scientists. Also, I am pleased to notice the growing number of publications by professors from the Lugansk East-Ukrainian University. Publication in the TEKA of articles by outstanding international scientists makes the journal even more reliable and contributes to its high scientific value.

Science has always been considered as the most complicated and delicate sphere of human activity. I believe that only due to science it can be possible to solve all the problems facing the mankind both now and in the future. But one must not forget the fact that all the discoveries and inventions of the scientists so far have not only been doing the good, but also the harm to all the human beings on the planet Earth. I am convinced that it is possible to stop this tendency only due to openness, reliability and accessibility to the broad public of all the results of research which is carried out worldwide. The best way of achieving this is their publication in scientific journals in which authors from different countries can share the details of scientific results and show their perspectives.

My best wishes of great success in your editing work reaching the widest possible international academic community of readers

Yours sincerely

Professor Oleksandr Golubenko
Rector of the East-Ukrainian Vladimir Dahl National University
